

1. Explain seven Data warehousing components with neat diagram
2. Explain Data warehouse Architecture with neat diagram
3. Explain DBMS Scheme for Decision support in data warehouse
4. Explain Supportive vector machine methods with examples
5. Explain Data Mining architecture with a neat Diagram
6. Explain the generation of candidate itemset and frequent pattern with minimum support count = 2 by using Apriori algorithm with below example.

TID Item Set

10 A, D, E

20 B, C, E

30 A, B, C, E

40 B, E
